### SECTION 4. FIRST AID MEASURES

**Eyes:** Flush well with water for at least 15 minutes, holding eyelids open. Remove any contact lenses. If irritation persists, seek

medical attention.

**Skin:** Wash with soap and water. Remove contaminated clothing and launder before reuse. If irritation persists, seek medical attention.

**Inhalation:** If symptoms develop, move victim to fresh air. If breathing is difficult, have a trained person administer oxygen. If respiration stops, have a trained person administer artificial respiration and call a physician.

**Ingestion:** DO NOT INDUCE VOMITING. Call a physician immediately. If victim is completely conscious and aware, have him rinse out mouth, then drink 8 oz. water to dilute. Never give anything by mouth to an unconscious person.

## SECTION 5. FIRE-FIGHTING MEASURES

**Flammability:** Class IIIA Combustible liquid Flash

**Point:** Flash Point: 180°F (82°C)

**Extinguishing Media:** Foam, dry chemical, carbon dioxide fire extinguishers, water spray. Do not spray water directly on fire. Use water spray to cool containers.

**Specific hazards arising from chemical:** None known.

**Hazardous combustion products:** Carbon monoxide and carbon dioxide.

**Firefighting protective equipment:** Wear a self-contained breathing apparatus with a full face piece operated in the positive pressure demand mode with appropriate turn-out gear and chemical resistant personal protective equipment.

**Sensitivity to static discharge:** This product is combustible a Class IIIB Combustible liquid.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions:** Use personal protective equipment. Eliminate all ignition sources. Ventilate area.

**For Small Spills:** Spilled material may be slippery. Avoid dispersal of material and runoff into soil, waterways, drains and sewers. Vapor-suppressing foam may be used to reduce vapors. Neutralize spill with mild acid, such as citric acid. Absorb spill with vermiculite or other inert material, then place in a container for chemical waste with non-sparking tools. Wash walking surfaces with water to reduce slipping hazard. Dispose of contaminated absorbent material in accordance with local, state and federal regulations.

**For Large Spills:** Large spills cannot occur due to packaging.

## SECTION 7. HANDLING AND STORAGE

**Handling:** Wear personal protection equipment. Use with adequate ventilation. Do not handle around sources of ignition. Use proper bonding and grounding during product transfer as described in document NFPA 77. Use explosion-proof equipment and non-sparking tools. Take precautionary measures against static discharge. Never use welding or cutting torch on or near drum (even empty) because product can ignite explosively. Do not premix with other chemicals. Do not eat, drink or smoke in work areas. Wash thoroughly after handling.

**Storage:** Keep away from heat, flame, or sunlight. Keep from freezing. Keep container tightly closed when not in use. Store locked up. Store in a well-ventilated place. Protect from physical damage. Store away from oxidizers, acids, alkalis, chlorates, chlorine, organic amines, aluminum, zinc, tin, copper and their alloys.
