APPLICATIONS
Premium Pure Photopolymer emulsion for commercial and industrial graphic printing, close tolerance imaging, electronic circuits, and compact discs.

PHYSICAL PROPERTIES
- Green colored PVA-SBQ Pure Photopolymer Direct Emulsion
- Pre-sensitized for immediate use
- Fast exposures, 3-5x faster than diazo based emulsions
- Excellent for use with UV, solvent based and textile ink systems
- Virtually pin hole and fish eye free
- Extremely durable on press
- Outstanding resolution and definition of fine lines and halftones
- 37% solids content

MESH PREPARATION
It is important to remove any contamination, residual inks, cleaning chemistry, or general dirt and dust. Murakami 701 Haze/Ghost Remover (a non-caustic water soluble liquid) will remove residual ink and/or emulsion. Murakami 801 Screen Degreaser will help eliminate any further contaminants. Completely dry the screen before coating.

COATING PROCEDURE
- Use a clean dry coating trough that has a nick free surface for smooth coating.
- Apply one or two coats of emulsion to the print side. Rotate the frame 180 degrees and apply one or two coats of emulsion to the squeegee side.
- Additional coats may be added to the print side if thicker stencils are required.

HANDLING
Handle under yellow safelights. Avoid exposure to sunlight, flourescent and incandescent lights.

SENSITIZING
This PVA-SBQ emulsion is ready to use. There is no need to add sensitizer.

DRYING
Dry the coated screen horizontally with the print side down in a clean light safe area. The following will help to ensure complete drying:
- 86° to 104° degrees F (30° to 40° C)
- 30% to 50% relative humidity
- Good air circulation
The use of a screen drying cabinet with heated airflow can help in maintaining these conditions.
EXPOSURE
Clean the film positives and vacuum frame glass prior to exposure to minimize pinholes. Exposure is affected by mesh color, emulsion type, coating thickness, lamp type and the age of the bulb itself. For best results use an exposure calculator to determine the correct exposure time. It is important that a lamp designed for exposing screen printing emulsions is utilized.

Note: The use of film positives that are either frosted or have weak black density can reduce resolution and definition qualities of the coated screen.

200 Y 45-50
250 Y 40-45
300 Y 35-40
350 Y 25-30
420 Y 20-25

Note: All exposure times listed above are suggested times using a 5KW Metal Halide lamp at a distance of 40”.

WASHOUT
Gently spray both sides of the screen with lukewarm water, wait a few seconds to allow emulsion to soften then wash print side of screen until image is fully open. Rinse both sides thoroughly and dry. The use of a drying cabinet or fans is recommended to dry the screen.

RECLAIMING
- Use Murakami 501, 505 or 507 Screen Cleaner to remove all excess ink from the frame.
- Remove the emulsion with Murakami 601, 605, or a solution of Strip Super-P. Rinse thoroughly.
- Use Murakami 701 to remove haze and ghost if required.
- Degrease with Murakami 801, rinse both sides thoroughly and let dry.

STORAGE AND HANDLING
Store the emulsion in a cool dry area. Un-sensitized emulsion has a shelf life of at least one year when stored at room temperature.

Use Murakami PVA-SBQ emulsion within one year for best results.

Coated screens may be stored for up to one month when kept under the following conditions:

- 59° to 77° degrees F (15° to 25° C)
- 30% to 50% relative humidity

ADDITIONAL FEATURES
One Pot Sol - C is recommended as a backing emulsion for capillary and thick films. It can be used on fine SS wire for critical detail.
I. PRODUCT IDENTIFICATION

Trade Name (as labeled): **ONE POT SOL C**
Manufacturers Name:
Murakami Screen USA Inc.
745 Monterey Pass Road
Monterey Park, CA 91754
Phone Number: 800-562-3534

All ingredients of this product are listed under the TSCA INVENTORY

III. HEALTH AND HAZARD INFORMATION

TOXICOLOGY

Threshold Limit Volume: Vinyl Acetate: 10PPM (2001 ACGIH TWA)
Isopropyl alcohol: 200PPM (2001 ACGIH TWA)

Inhalation: Excessive exposure may cause irritation to upper respiratory tract. A single prolonged exposure is not likely to be hazardous. Signs and symptoms of excessive exposure may be to the central nervous system.

Skin Contact: Excessive exposure may cause minor irritation.

Eye Contact: May cause eye irritation and also moderate corneal injury.

Protective Equipment: Gloves, safety glasses

IV. FIRST AID PROCEDURES

Never give fluids or induce vomiting if patient is unconscious or having convulsions. Medical conditions aggravated by exposure may be pre-existing skin or other physical conditions.

Ingestion: Induce vomiting if large amounts are ingested. Contact a physician.

Eye: Rinse well with water immediately and continuously. Contact a physician if irritation persists.

Skin: Wash well with soap and water. Contact a physician if irritation persists.

Inhalation: Remove patient from the area to fresh air. Contact a physician if irritation persists or breathing becomes difficult.

NOTE TO PHYSICIAN: No specific antidote. Supportive Care: Treatment based on judgment
of the physician in response to the reactions of the patient.

V. SPILL, LEAK, AND DISPOSAL PROCEDURES

Steps to be taken in case of spills or leaks:
Spillage should be contained by and covered by large quantities of sand, earth, or similar absorbent material, then brushed in vigorously to assist absorption. The mixture can then be collected with a plastic shovel into drums, plastic bags, or containers and remove for disposal. Prevent from flowing into ground or surface water.

Disposal: Follow all relevant regulations for disposal. Check with your local authority.

Storing: Store container tightly closed in a well-ventilated, cool, and dark place. Keep away from heat and sunlight (UV light).

Note: Dispose all waste material in accordance with federal, state, and local authorities.

VI. PHYSICAL PROPERTIES

Specific Gravity @ 77°F (25°C): 1.1g/cm3
Viscosity @ 77°F (25°C): 4000-6000mPas
Boiling Point: 100°C
pH Value: 4.0-6.0
Appearance and Odor: Green liquid with mild odor.

VII. FIRE AND EXPLOSION

Flash Point / Method: Not flammable
Appropriate Extinguishers: Use water, foam, dry chemical and/or CO2.

VIII. REACTIVITY DATA

Stability: Stable under normal conditions.
Conditions to avoid: Heat and exposure to sunlight (UV light).

IX. SPECIAL HANDLING PROCEDURES

Ventilation and engineering controls:
None required. Local exhaust ventilation may be necessary for some operations.

Respiratory Protection:
None required under normal conditions. If respiratory irritation is experienced, use an approved respirator. Use an approved self contained breathing apparatus if emergency conditions occur.

Eye Protection:
Use safety glasses.

Storage: Protect from freezing.

X. REPORTING REQUIREMENTS AND ADDITIONAL INFORMATION

HMIS Code System Rating: Health 1; Flammability 0; Reactivity 0.
NFPA 704 Code System Rating: Health 0; Flammability 0; Reactivity 0.
Volatile Organic Compound (VOC): None
Contains no carcinogen or petroleum hydrocarbons.

Note: Information herein is given in good faith and accurate to the best of our knowledge. No warranty is given, expressed, or implied.
