

## SCREEN PRINTING CHEMICALS

# ER-188

## Full Strength Emulsion Remover

### DESCRIPTION

ER-188 is a full strength emulsion remover designed for fast removal of emulsions and capillary films from screens.

### ADVANTAGES

- ❖ Fast removal of hardened emulsions
- ❖ Economical
- ❖ Ecologically sound
- ❖ Drain Safe

### DIRECTIONS

Before using, clean the ink from the screen with non film forming ink remover such as Bio-2. As a good pre-rinse step, rinse the screen with water to remove any block-out. Spray on ER-188 in a uniform pattern onto the print contact side of the screen. In some cases better results are obtained by applying ER-188 onto both sides of the screen. Allow to stand up to 3 minutes depending on the type and hardness of the emulsion. Remove the emulsion using a medium to high pressure cold water rinse. Flush the screen with a final rinse to remove any trace chemicals left on the screen. Allow to dry completely before recoating.

### TYPICAL PRODUCT PROPERTIES

Appearance	-----	Clear, colorless liquid
Odor	-----	Unscented
pH	-----	4.5
Flash Point	-----	None
Specific Gravity	-----	1.02
Stability	-----	Stable
